

1. Education:

- What is your highest level of education?
- What degree(s) have you earned and from which institution(s)?
- What was your major or field of study?
- Did you receive any academic honors or awards?

2. Technical Skills:

- What programming languages are you proficient in?
- What software tools or frameworks have you worked with?
- Do you have experience with any specific databases or operating systems?
- Are you familiar with any specialized tools or technologies relevant to your field?

3. Projects:

- Can you describe any significant projects you have worked on? What was your role?
- What were the goals and outcomes of those projects?
- Did you collaborate with a team or work independently on these projects?
- Did any of these projects have a measurable impact or result in any achievements?

4. Experience:

- What is your employment history? Please provide the job titles, companies, and dates of employment.
- What were your main responsibilities and tasks in each role?
- Did you achieve any notable accomplishments or receive any recognition during your employment?
- Were there any specific technologies or tools you utilized in your previous roles?

5. Personal Development (Alternative to Work Experience):

- Have you pursued any additional certifications, training, or professional development courses? If yes, please provide details.
- Have you attended any relevant workshops, conferences, or industry events?
- Are you involved in any professional organizations or communities related to your field?

6. Soft Skills:

- What are some of your key strengths or soft skills that you possess?

- Can you provide examples of situations where you demonstrated leadership, teamwork, or problem-solving skills?
- How do you communicate and collaborate with colleagues or clients?
